

The AST-IS Industrial Transmitters contain a non-dispersive, infrared sensor for the accurate and reliable detection of carbon dioxide (CO₂). There are 4 models available with different options. All models are low maintenance and a key component for climate control of buildings and other processes.

AST-IS3 is a duct mount, IP54 rated enclosure for installation in the ventilation duct. Standard 0 - 2,000 ppm range.

AST-IS6 is a wall mount enclosure with protection class IP54, includes a display and is ideal for most large spaces. Standard 0 - 2,000 ppm range.

AST-IS12 is a duct mount, IP54 rated enclosure for installation in the ventilation duct, includes a display, relay and Modbus® output. Standard 0 - 2,000 ppm range.

AST-IS18 is a wall mount, IP65 rated enclosure that is specially coated PCB with an extra dust/water protection filter suited for greenhouses, wineries and similar environments. It offers a 0 - 4% vol range, two relays (unless the optional temperature sensor is installed) and a display.

The **AST-IS18-M** transmitter is the same as the AST-IS18 but with Modbus® output for communicating with a Controller or a Business Automation System (BAS).
